About me

Throughout my career, I participated in software projects, discussing requirements, programing and ongoing support that result in the successful design and wonderful performance of applications. I realize motivation of users is the most important part, so my core concept is "taking human beings as the essential".

EMPLOYMENT HISTORY

Micron | Software Engineer
Taichuang, November 2018 - Present

2019 Performance Achievement
- Mish is a well experienced Web front-end developer, she helped us to improve the GQWeb performance by at least 200%.
- Rewrite two systems for Quality team.
- play important role of technical research and innovation in our team.

Zyxel | Software Engineer
Hsinchu, August 2015 - October 2018

At first my main job is front-end.I have to create people's favorite UI of product. After confirm user's requirements, I deliver several versions of wireframe during discussion many times with the members until we reach a consensus. Next, I make a simplified mockup, and then apply to Jquery or Angular. With more and more users on line, we face serious problems of product performance. We have to rebuild most of back-end programs and release it on time, so I dedicate to Restful API design, MongoDB access, and implement with Pyhton language.

Nebula phase3
- Design and implement Restful api to provide interoperability between BE and FE.
- Modeling data in MongoDB and implement with pymongo.

Nebula phase2
- Concatenate restful api with Future Promise. eg: Requests.
- Created customer support materials with AngularJS. eg: Table.
- Responsive web design pages. eg: pages.

Cloud Network Center
- Design pages with UI & UX. eg: wireframe.
- Demonstrating project management abilities.

Skill

Soft Skills
- Well-developed troubleshooting, analytical, problem solving.

- Determine the relevance of suggested arguments and ideas, and analyze the relative importance of each.
- Have the ability to quickly learn technology trend.

Hard Skills

- Work experience of Backend, Frontend (Web Design) and Linux Server.
- Farmiliar with: **Angular, Python, Git, AWS/Azure Cloud Service, MongoDB, Linux environment**.
- Participated in SCRUM methodology.
